Business Analysis and Valuation has been developed specifically for students undertaking accounting Valuation subjects. With a significant number of case studies exploring various issues in this field, including a running chapter example, it offers a practical and in-depth approach. This second edition of the Palepu text has been revitalised with all new Australian content in parts 1-3, making this edition predominantly local, while still retaining a selection of the much admired and rigorous Harvard case studies in part 4. Retaining the same author team, this new edition presents the field of valuation accounting in the Australian context in a clear, logical and thorough manner.

The term "takeover", of which the first form is mergers and acquisitions (M&A), refers to the transfer of control of a business from one group of shareholders to another. Considering the importance of this issue and the real drives behind takeovers, it has become imperative to identifying companies that are vulnerable to takeover by two types: tender offer and exchange offer. This book thus presents the legal aspects, the theoretical justifications and the empirical contributions of takeovers, and analyzes the economic and financial characteristics of targets in order to assess the probability of being acquired. An empirical approach based on two quantitative studies is then applied to the European market, which is still virgin territory in terms of academic research. Finally, acquisition probability models have been developed and they have a 72% forecast accuracy average rate of targets. Corporate Takeover Targets is aimed at students and researchers in economic and management, as well as M&A consultants.

The definitive guide to valuation written by a who's who of today's top practitioners The Valuation Handbook differs significantly from other related books on this topic because the contributors are practitioners, academics, and investment firms that explain how they value companies and other assets. It concentrates on specific and innovative valuation techniques, rather than the theoretical approaches more generally accepted and discussed. Given the extreme volatility of the stock market, valuation is a critical issue for analysts, investors, and businesses. Here, various professional contributors explain how their firms approach the valuation process, while academic contributors share their valuation consulting and research experience. Examines how to value assets in today's dynamic market setting Offers a broad spectrum of ideas from some of the top practitioners and academics in this field Highlights state-of-the-art approaches to company valuation Filled with in-depth insights and expert advice, The Valuation Handbook puts this difficult discipline in perspective.

These proceedings gather contributions presented at the 3rd International Conference on Applied Operational Research (ICAOR 2011) in Istanbul, Turkey, August 24-26, 2011, published in the series Lecture Notes in Management Science (LNMS). The conference covers all aspects of Operational Research and Management Science (OR/MS) with a particular emphasis on applications.

Investors, shareholders, and corporate leaders looking for an edge in today's New Economy are moving beyond traditional accounting yardsticks toward new means of gauging performance and profitability. An increasing number of Wall Street analysts and corporate boards are adopting value-based metrics such as EVA, MVA, and CFROI as a measure of a firm's profitability because these standards adjust for all of the firm's cost of capital - equity as well as debt. James Grant tackled the issue of economic value added in its infancy with Foundations of Economic Value Added - one of the first primers on the topic, endorsed by its creator, G. Bennett Stewart. Now, in Value Based Metrics: Foundations and Practice, he and Frank Fabozzi head a team of some of the leading proponents of value based metrics on both the investment management side and the corporate side. This comprehensive reference outlines how corporations and analysts can use value based metrics to more accurately measure the financial performance of individual companies, industries, and economies, as well as how to get an edge in today's turbulent market.

Research, Standard Setting, and Global Financial Reporting aids researchers in conducting research relevant to global financial reporting issues, particularly those of interest to financial reporting standard setters. Research, Standard Setting, and Global Financial Reporting: describes the relation between research and standard-setting issues .explains how a variety of research designs can be used to address questions motivated by standard-setting issues, including valuation research and event studies. .offers examples of research addressing a specific global standard-setting issue - use of fair value in measuring accounting amounts .offers further opportunities for future research on specific standard-setting topics by providing motivating questions relating to the major topics on the agendas of the FASB and IASB. .explains how the IASB aims to achieve its mission of developing a single set of high quality accounting standards that are accepted worldwide. .summarizes extant evidence on the relative quality of accounting amounts across global standard-setting regimes and whether global financial reporting is achievable or even desirable. Research, Standard Setting, and Global Financial Reporting examines opportunities for future research on issues related to globalization of financial reporting by identifying motivating questions that are potentially avenues for future research."

This book on fintechs shows an international comparison on a global level. It is the first book where 10 years of financing rounds for fintechs have been analyzed for 10 different fintech segments. It is the first book to show the Canvas business model for fintechs. Professionals and students get a global understanding of fintechs. The case examples in the book cover Europe, the U.S. and China. About the author: Matthias Fischer is professor of finance and banking at the Institute of Technology Nuremberg Georg-Simon-Ohm in Germany. His research has focused on strategy and M&A in the banking sector, value-based management, robo-advisory and fintechs. Dr. Fischer also serves as a member of the Groupe de Recherche en Management at the IAE Nice Graduate School of Management, Université Côte d'Azur in France. He is internationally active as a strategy and financial advisor. Reviews of the book: FinTech is not the next 'big thing.' It is the big thing now! FinTech is the new business model for the global financial sector, offering clear and enormous potential for vast economies of scale and scope, massive cost savings and efficiency gains, significant risk reduction, and opening the door to banking for literally billions of currently unbanked people. Professor Fischer has done a masterful job of expertly and informatively taking us through all aspects of the revolutionary new FinTech business models. Using state-of-the-art research techniques, he insightfully shows us how FinTech firms are financed and how they aspire to create value. His in-depth case studies unlock the keys to success in the FinTech sector. His fascinating book is a 'must read' for all financial professionals. Dr. Stephen Morrell, Professor of Economics and Finance, Andreas School of Business, Barry University, Miami, USA Matthias Fischer's latest book offers a comprehensive overview of Fintech business models around the world. With a very pedagogical approach, and in a particularly fluid style, the author takes us into the strategic logics of these new entrants to finance, who are carriers of innovation and sometimes of disruption, and whose strategies are focused on the need to always meet the emerging expectations of their customers. This precise and well-documented analysis should enable banks to reposition themselves in their ecosystem by studying these new business models, which will enable them to boost their growth. Professor Dr. Nadine Tournois, Dean of IAE Nice Graduate School of Management, Université Côte d'Azur, France, Chevalier de la Légion d'honneur Fintech Business Models is a must-have book to understand the rapid and intense changes occurring in the financial sector. New technologies have allowed the birth of new financial species, such as Fintech, more adapted to the new digital economy. The content dedicated to the application of blockchain technology helps to understand its opportunities in the financial sector, not only in the means of payment and cryptoactives, but also in how blockchain can make multiple internal processes improve, allowing to optimize the management, efficiency and even security of operations. Without any doubt, this book offers an extraordinary vision of how the fintech sector has become a catalyst for change in banking in the context of the current Digital Society. Phd. Ricardo Palomo, Full Professor of Finance, Deputy Chancellor for Digital Transformation at Universidad CEU San Pablo, Madrid, Spain and member of the Board of Alastria Blockchain Ecosytem This book provides a detailed and original overview of the most important fintech business models in the major global markets. Through a savvy use of the well-known Business Model Canvas methodology, the author explores the unique ecosystem, business model's components, and sources of competitive advantage of successful fintech firms. The book, in particular, offers an insightful and comprehensive analysis of the winning and losing strategies and performances of fintech firms by segment of activity such as, instant digital payments, crowd-funding, robo-advisory, alternative finance, credit & factoring, social trading, personal finance management, blockchain and cryptocurrencies. It is indeed a very unique and valuable study on the fintech industry, its trends, and its emerging business models. Prof. Ivo Pezzuto, The International School of Management, Paris, France and Adjunct Professor of International Business and Strategic Management Università Cattolica del Sacro Cuore, Department of Business Management, Milan, Italy The emergence of fintechs is one of the most relevant drivers of change in the financial services industry. The book presented here delivers an impressive overview of fintechs' activity areas, business models and funding patterns. The book reflects the state of the art of the current fintech world. Prof. Dr. Jürgen Moormann, Professor of Bank and Process Management at Frankfurt School of Finance & Management, Germany

Equity Valuation reviews and critically examines the standard approach to equity valuation using a constant risk-adjusted cost of capital and develops a new valuation approach discounting risk-adjusted fundamentals using nominal zero-coupon interest rates. Equity Valuation is organized as follows. Chapter 2 (Risk-adjusted Discount Rates) reviews standard valuation models based on risk-adjusted discount rates. Chapter 3 (Multi-period Asset Pricing Theory and Accounting Relations) examines key results from multi-period asset pricing theory in discrete-time, and shows how equity valuation models can equivalently be based on free cash flows or accrual accounting numbers. Based on these results, the authors derive an accounting-based multi-period equity valuation model presented in Chapter 4 (An Accounting-based Multi-period Equity Valuation Model) with equilibrium risk-adjustments determined by prices of aggregate consumption claims. Chapter 5 (Equity Valuation with HARA Utility) includes a general equilibrium analysis of a setting in which the investors have HARA utility, and aggregate consumption and residual operating income are jointly normally distributed. A set of appendices follows including Appendix B that extends the setting to preferences with external habit formation (which recently has gained popularity in asset pricing theory), and Appendix C, which discusses the relationship between risk-adjusted expected cash flows and certainty equivalents.
