A wide range of contemporary challenges and threats, and their volatility, uncertainty, complexity and ambiguity make it necessary to develop a new, flexible and integrated holistic approach. The modern world requires NATO to build institutional partnerships with a range of actors. This applies not only to the other major international organizations, such as the United Nations and the European Union, but also to non-governmental organizations (NGOs) as well as the private sector, for example the energy and IT sectors. All these players must become partners in the attempt to cope with multi-dimensional security-related problems. Given the vast differences in their goals, mandates, methods and philosophy of action, building trusting and effective relationships between them will be an arduous process. Nevertheless, as the biggest political and military organization in the world, NATO cannot avoid contemporary challenges if it does not want to "go out of business".
