Jero is a curious wild beast, whose dreams and questions are bigger than her tiny frame. But she has a plan - get selected to the council, lead the migration, and then take everyone on an adventure. A surprising twist of fate might just make her wish come true. And it was nothing that she had expected. Jero's journey is a relentless adventure through the breath-taking landscapes of Serengeti, filled with encounters with ostriches, elephants, hippos, pythons, and many others along the way. On a journey where danger lurks at every turn of the journey in the form of prowling predators, deadly disease, and raging rivers, Jero will be faced with hard challenges and harder decisions. Will she be ready for it? Will she be able to lead her friends and her co-travellers? Will she be able to prove herself worthy? This adventure is a story of friendship, courage, and growing up. Above all this is a story about finding your own path in a herd where every year, a million wildebeest migrate together for thousands of miles in the same journey.

A Chinese classic, the Shan Hai Jing, reportedly from 2000 BC claimed travels to the ends of the earth. However, today many, while accepting the antiquity of this account, believe it was just mythology. But was it? Testing the hypothesis that the Shan Hai Jing described actual surveys of North America, Charlotte Harris Rees, author of books about early Chinese exploration, followed an alleged 1100 mile Chinese trek along the eastern slope of the US Rocky Mountains. The Chinese account should have been easy to disprove. In the travelogue Did Ancient Chinese Explore America? Rees candidly shares her initial doubts then her search and discoveries. She weaves together history, subtle humor, academic studies, and many photographs to tell a compelling story.
